Scrum Guide

Updating your Backlog

The Backlog is the set of User Stories in an Iteration, plus a plan for delivering and reaching the Iteration Goal.

The Backlog is a prediction about the functionality in the next iteration.

Fix My Profile		aliquip	ipsum duis sit ipsum
Filter Service Tickets	dolor ipsum culpa	vale culpa	aliquip
Quick Tips	ipsum sit duis duis		

# Updating your Backlog

The backlog typically has four columns.

1. Forecast/ User Story column

2. To-Do / Pending Column

3. Doing / In-progress

4. Done

SPRINT BACKLOG			
Forecast	**To-Do**	**In-Progress**	**Done**
Fix My Profile		aliquip	ipsum duis sit ipsum
Filter Service Tickets	dolor ipsum culpa	vale culpa	aliquip
Quick Tips	ipsum sit duis duis		

Updating your Backlog

1   **2**

Column 1: Forecast / User Story / Pipeline, This column shows you what user stories you are planning to cover throughout the Iteration (sprint).
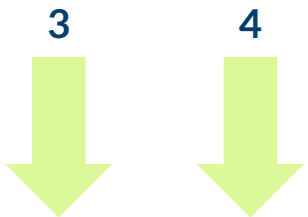

Column 2: To do / Pending. These are the User Stories that are next.

SPRINT BACKLOG

Forecast	To-Do	In-Progress	Done
Fix My Profile		aliquip	ipsum / duis / sit / ipsum
Filter Service Tickets	dolor / ipsum / culpa	vale / culpa	aliquip
Quick Tips	ipsum / sit / duis / duis		

Updating your Backlog

Column 3: In-Progress / Doing. This column shows you the user stories you are currently working on.

**Column 4:** Done. This column shows you what User Stories you have finished working on.

Updating your Backlog

Your user stories must be moving to from left to right continuously, indicating good velocity and effective work.

It is very important you keep the backlog UPDATED--constant communication is essential. This can be done daily to avoid mistakes.

"

Clear and Constant Communication is KEY to effective Software Development, we can read emails and text messages, but not people's minds.

"
